# Zero Inventory - Print on Demand Platform as a Service

- Only print what is needed
- Always up-to-date documentation
- Fast time to market
- All-in-one service

Zero Inventory - Print on Demand Platform as a Service

A sustainable solution via Print-on-Demand as a Service for your printed material needs.

A platform that offers the flexibility for your different markets or stakeholders to order printed manuals based on actual needs. The biggest advantage is the optimized costing, no obsolescence, and fast time to market.

Market Forecasting Module

Our marketing forecast allows regions to fill in print volume in an early stage based on the numbers in their target market. It provides anticipated numbers that a company expects and can be easily changed if your sales/manufacturing go up or down.

Order Pipeline

The order pipeline is the actual ordered print work per period (per month e.g.). The order pipeline is used for print planning and makes it a controlled and efficient tool to assemble all orders per market per type of documentation per product.

Zero Inventory - Print on Demand Platform as a Service

We simplify technical documentation challenges for OEMs, as even the best technicians get challenged
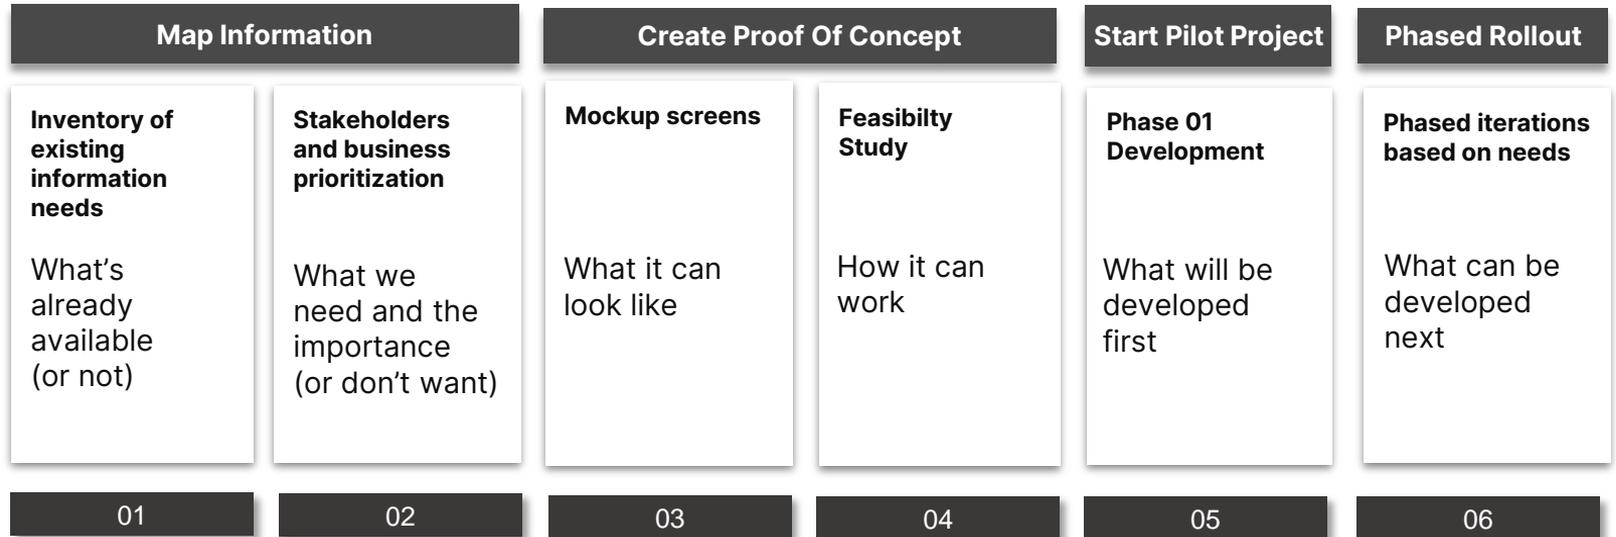

Print and Packaging service

Once printed, the documentation needs to be properly shrink-wrapped and packed. Tweddle supports OEMs with an all-in-one (ecological) service.

Customer support

As a company, you do not need to take care of the process. We support the entire process, so you can focus on what matters most, managing your business. When your stakeholders have questions related to their ordered printed material or shipment, we answer them quickly as part of the deal.

How we work

Map Information		Create Proof Of Concept		Start Pilot Project	Phased Rollout
Inventory of existing information needs What's already available (or not)	**Stakeholders and business prioritization** What we need and the importance (or don't want)	**Mockup screens** What it can look like	**Feasibilty Study** How it can work	**Phase 01 Development** What will be developed first	**Phased iterations based on needs** What can be developed next
